

STREET SIGNS

Street name signs are available single faced or double faced. They are assembled with Engineer grade, High Intensity, or VIP Diamond grade reflective sheeting on extruded or flat aluminum blades. Standard colors are white copy on green background, white on blue, white on brown or black on white. Other colors are available upon request. Custom decals may also be applied to your street signs. These decals may be printed with custom art to represent your city, county, or civic organization. The MUTCD recommends using 6" letters on 9" street signs.

Top: Engineer Grade Sheeting, 4" copy.
Bottom: High Intensity Grade Sheeting, 6" Copy.

Don't forget the Post Driver! Page 24

6" flat or extruded and 6 3/4" extruded are available in 24", 30", 36", 42" lengths. 9" flat or extruded available in 30", 36", 42", and 48" lengths. Other sizes available upon request.

Length of blade is determined by the amount of letters. The following is for 6" or 6 3/4" blades.

- 1-8 letters (do not count suffix) = 24" length
- 8-11 letters (do not count suffix) = 30" length
- 11 letters and up (do not count suffix) = 36" length
